W. V. NEWSON,
Deputy Provincial Treasurer,
Edmonton, Alberta.

Thomas Hughes Exonerated.

Accused of Criminal Offence, Was Convicted on Summary Trial Before Local J. P., on The Evidence of Mrs. Dunlop.

Just One Example of How British Justice is Being Meted Out To The Citizens of The Pass.

A sitting of the District Court was held in the L.O.O.P. hall on Wednesday, when the following cases were disposed of by His Honor Judge E. P. McNeill:

A. Brunetta versus S. Salvador, claim \$26.80 J. E. Gillis for plaintiff, J. C. Hendry for defendant. Case dismissed.

E. Van Bruseel versus his son, R. Van Bruseel, claim \$75.00. J. E. Gillis for plaintiff, in person defendant. Judgment for plaintiff.

Torok Mrs. versus J. Stevens, claim \$380.95. T. Ede for plaintiff, J. K. Gillis for defendant. This case arose out of a sale and business transfer taking place in 1914, (or as stated by the plaintiff's solicitor "1919"—fifty five years before plaintiff was "in the heavens"), and was mainly a claim for damages as a result of non-fulfilment of contract, wherein title could not be acquired. Several witnesses were heard, and pitiable stories of the sad fate of pigs, cats, sheep and chickens were related for the entertainment of the audience. One witness, when being cross-examined by the legal light, made use of the remark: "What's matter you? You no talk good. Mr. Gillis good man talk like some were an talk loud. You talk like d—n fool." Judgment was given in this case in favor of plaintiff for \$300 and costs.

The case of Rex vs. Hughes came up for hearing in the afternoon. This was an appeal entered against the judgment of one Christen Jung, J.P., whereby Thomas Hughes, a resident of Frank, was convicted on the evidence of Mrs. Annie Dunlop of a serious charge and fined the sum of \$10 and costs. Mr. Campbell, K.C., appeared for the Crown; J. E. Gillis for the appellant.

Mrs. Annie Dunlop, sworn, stated that on the morning of April 21st, the accused, Thomas Hughes, is company with another man, eight entrance into her house at Frank about 5 a.m., and that she was quite positive one of the two men was the accused, to whom she had been introduced about two months previous.

J. Hallendach, sworn, stated that he was a resident of Beaver mine, and in company with M. Peck came in to Frank on the afternoon of April 20th, arriving at Hughes' house about four o'clock. They retired about 11 p.m., all three sleeping in the room; and the first of the trio to rise next morning was Peck, at or about 6 o'clock. The accused was not out of the room from the time they retired till about 6.30 a.m., when he got up and all three spent the greater part of the day gathering goods together preparatory to moving out to Beaver Mine. He never heard the accused mention anything about the complainant. He had known Thomas Hughes for about seven years, and thought that no one held a better reputation.

M. Peck, of Beaver Mine, sworn, stated that he knew the accused for about eleven years, and knew him to be a man of good character, and would never believe that he was ever capable of doing anything unbecoming a gentleman. On the afternoon of April 20th, he arrived at Frank from Beaver Mine, in company with Hallendach, for the purpose of moving Thomas Hughes and his effects out to the homestead. Thomas Hughes was at home when they arrived, about 4 p.m., and left

the house but once between that time and 11 o'clock when they all retired, and as far as he knew the accused did not leave the house between that hour and 7 a.m. He did not know the gentleman referred to as being in company with the accused on the morning of April 21st.

In summing up the evidence, His Lordship felt that the case apparently resulted from a mistaken identity on the part of Mrs. Dunlop, and that there was not the slightest reason to believe that the accused was or would be guilty of such a charge as that laid, and decided that the decision of His Honor Judge should be reversed and the amount of fine and costs paid be refunded to the accused, together with deposit. He could not include costs from the complainant, knowing that she was dependent upon a husband now with His Majesty's forces.

For the benefit of the public, it may be mentioned that at the summary trial of Thomas Hughes, the case was held "in camera," a friend of Hughes, O. Legace, of the morning, being refused admission to the courtroom, and the only parties in the room, as far as can be learned, were the magistrate, a number of the R.N.W.M. Police force, the plaintiff and defendant. The defendant had never been in a court before, and when asked as to whether he had anything to say in his own defence or any witnesses, did not know just what steps were necessary for him to take. As a result, Thomas Hughes, an innocent man, was declared a criminal, and although his character is today to a certain extent vindicated, the said Thomas Hughes is out of pocket in the neighborhood of some fifty dollars, just because of a so-called "mistaken identity" or a gross miscarriage of justice. Surely someone is responsible for this outrage, and should be made the subject of a thorough and immediate investigation.

There seems to be nothing to prevent a recurrence of such an action, and anyone is liable to be brought before a justice, and though innocent, be compelled to pay to prove his innocence or suffer the consequences of having a biased character the rest of his days.

Death of "Paddy" Ryan

Word has been received from Markdale, Ontario, stating that Patrick Ryan, well-known former resident of Cowley and the Crows' Nest Pass, had passed away in that town on May the 11th. "Paddy" had been in poor health for the past couple of years. Up to several months ago he resided on a ranch near Cowley, but his condition became such as to necessitate his going east to his former home. He was about thirty-five years of age.

Mutt and Jeff's Wedding

Even more suspiciously than either of his former seasons, did Bud Yab's happy thought character conception. Mutt and Jeff, open its fifth season as a musical comedy offering to the public. With an entire new production from scenery to music, Mutt and Jeff have set out to conquer new lands. Their wedding is the title of the new vehicle selected to lead our new launce to fame and fortune in the land of dreams. From its premier presentation, they have played to absolute

New Alberta

Homestead Map

A new addition of the Northern
Alberta Homestead Map—a most
valuable publication, both from the
standpoint of the settler and the
businessman—has just been issued by
the Natural Resources Intelligence
Branch of the Department of the In-
terior, Ottawa.

While the primary object of this
map may be said to have been to
afford reliable information to the
prospective settler as to land open
for location, it is also designed to
assist the general public which in
many instances supply the "shove of
war" for the opening up of a new
country.

The colour scheme adopted in
former editions of the map has been
simplified in this the tenth edition.
The land has been divided into two
main classes. The first of these rep-
resents that which has been already
patented and the second shows that
which—while entered for—has not yet
been patented. In addition to these
divisions the various colours in
dicate forest reserves, Dominion
parks, timber belts, grass lands,
Dominion Land Offices, and coal
areas. The areas uncoloured and
shown as surveyed are available for
settlement.

Another very important feature
shown is the precise location of the
railroads—those great arteries of
trade—while other topographical
features such as the position of lakes
and rivers are also indicated.

As the great world war progresses
towards its conclusion, an ever in-
creasing stream of settlers will un-
doubtedly flow in the direction of
Northern Alberta. To such persons
as well as to the commercial com-
munity already referred to, this map will
offer a useful purpose. Application
to the Superintendent of the Natural
Resources Intelligence Branch of the
Department of the Interior, Ottawa,
will secure a copy, free of charge.

Departmental

Examinations, 1917

Departmental Examinations for
Grades VIII, IX, X, XI, and XII,
will be held this year, June 18th,
19th, 20th, 21st, 22nd, 23rd, 24th, 25th,
and 26th at the following centres:

Blairmore, Cardale, Lethbridge,
Medicine Hat and Ponchar Creek.

The examinations in the five grades
will be conducted at the same centres
and under the same presiding
examiners. The Department will
supply the required foolscap, draw-
ing paper, squared paper and ink.
But candidates are advised to provide
themselves with rulers, compasses,
pencilsharpeners, etc. Candidates writing
on the examinations in Drawing
should provide themselves with a
soft eraser, a good drawing pencil, and,
if possible, India ink, water
color and suitable brushes or brushes.
For the work in water color a supply
of water and conveniences for clean-
ing the brushes should be available.

Candidates who have not already
selected one of the above centres
should advise the Board at once at
which centre they desire to write.

The examinations for the Flathead
Second Year Commercial Centre will
be conducted at Calgary, Edmonton,
Lethbridge and Medicine Hat, during
the same period as the grade ex-
aminations.

Will Verge, now Capt. W. Verge,
C.E.F., formerly principal of St.
Peter's High School writes to a
friend here that he is now in Eng-
land. Capt. Will was principal of
a fine high school at Blairmore,
Alta., but enlisted with the Cana-
dians and is now on the other side.
His name should be added to the
list of men from the Arms who are
serving with the colors.—New-
foundland Twillingate Sun.

The Dominion government's ob-
servatory at Banff has been struck
by lightning and almost com-
pletely wrecked.

A Planting Song

Plant, plant, plant, the boys are join-
ing,
To sow the seeds that you can
raise!

Help to feed the army well,
Help to give the Kaiser hell!

Help to bring the brighter, better days,
Plant, plant, plant, the ships are sail-
ing.

Out to where the silent trenches wait;
Help to make the land arid and
barren for the nations free.

Help for the predatory state,
Plant, plant, plant, the nation's wealth
Field as well as forge to join the
fight!

Every acre more of wheat
Serves to bear the foe defeat,
Every bush of corn's a blow for land and
right!

Plant, plant, plant, the foes of freedom,
Grain and unadorned, still are strong;
Give 'em on with a pitchfork
Serve your country—do it now!

Help to deride the clutches of wrong!
Plant, plant, plant, and in the future
You need harvest richer far
Than the sheaves of golden wheat;
Liberty at last complete,
Life at last triumphant over War!

Pretty soon the crop of June
trifles will be ripe, Blairmore will
perhaps have a bumper.

Frank Happenings

Mr. and Mrs. Robert Niven spent
Sunday last with their daughter,
Mrs. E. C. Macdonald, at Bel-
levue.

A large number of local people
attended the "Little Miss Inno-
cence" performance at Blairmore
last night.

Rev. W. T. Young was in Cal-
gary this week, attending the Al-
berta Methodist conference, and is
expected home today.

Frank Krammer, of Medicine
Hat, has accepted the position of
master mechanic with the Franco
Canadian Collieries, taking up his
new duties today.

A number of members of the
Methodist church waited upon H.
Fitzsimmons and Fred Patton on
Saturday night last, and presented
them with a beautiful gold watch.

H. H. Fitzsimmons and Fred
Patton left Wednesday night for
Calgary, where they have enlisted
with the skilled railwaymen's bat-
talion and from which point they
will shortly leave for overseas.
Mrs. Patton and children have gone
to Cranbrook to reside.

The Professor's Bulletin

No. 22. Last week, I drew your
attention to the frequent mis-
quoting of such advice as "only
"chick." This week, I comment
on a closely allied subject—viz.,
the misquoting of the words "NOT
ONLY—BUT," in relation to the
classes of a sentence. Here, for
example, a sentence which I ran
across sometime ago—"The plan
met NOT ONLY with the general
approval of the Association work-
ers, BUT requests came from the
leaders of many other organizations
that the programme might be en-
larged to meet their needs or be
adapted to their work." Here,
after the introductory clause, "The
plan met not only with the general
approval of the Association work-
ers," one naturally expects to find,
immediately following, the state-
ment that the plan met with some-
thing else—in addition. Instead of
that, however, one discovers a
statement of something entirely
different—"but requests came."
etc. Now, in a sentence of this
nature, the clause following the
word "but" must be CO-ORDI-
NATE with the clause following
words "not only." And this rule
is violated in the example I have
given. The sentence in question
should, therefore, take the follow-
ing form—"NOT ONLY did the
plan meet with the general ap-
proval of the Association workers,
BUT requests came," etc.

Watch for this form of mistake
—watch with an "eagle eye" for
it is cropping up daily, both in
speech and in writing. I could list
several columns with examples.

"The Professor"

Several Lethbridge families are
enquiring for furnished rooms and
furnished houses in Blairmore,
where they anticipate spending the
summer.

The Experimental

Farms Report

The first volume of the Experi-
mental Farms Report for the year
ending March 31, 1916, contains much
information of value to the farmer
of Canada. At such a time as this
when production means so much to
the farmer as to afford to overlook such
information as this report contains
it is understood that it is avail-
able for the asking. It represents
the work accomplished on the Cen-
tral Farm at Ottawa and the fifteen
branch farms and sub-stations distrib-
uted over Canada. Volume I, contains
the report of the Director, which is
a general review of the work accom-
plished, also the reports of the Di-
visions of Chemistry, Field In-
dustry, and Animal Husbandry.
Volume II, not yet ready for distribu-
tion, will contain the reports of the
Divisions of Horticulture, Cereals,
Botany, Bee, Fungus Plants, Poultry,
Tobacco, Illustration Station, and
Extension and Publicity.

An interesting statement appears
in the report of the Director, which
deals with the cost of growing certain
crops, as follows: Mangels, \$1.66 a
ton; soyabean, \$1.40 a ton; corn,
19.30 cents a bushel and hay \$8.00
a ton.

The system of farming repre-
sented in these experiments is ex-
plained in the report. It is also
shown as a result of seven years
of experiment that the best way to
improve the soil is by fertilizing the
soil with a mixture of manure and
commercial fertilizer. It is shown
that the best way to improve the
soil is by fertilizing the soil with a
mixture of manure and commercial
fertilizer. It is shown that the best
way to improve the soil is by fertilizing
the soil with a mixture of manure
and commercial fertilizer. It is shown

Deputy Provincial Treasurer,
Edmonton, Alberta.

Bellevue Happenings

R. Livett returned from Indianapolis on Saturday last.

Rev. A. J. Law left for Calgary on Wednesday to attend the Methodist conference.

Mrs. E. W. Christie, after spending some time at Red Deer, returned home on Tuesday.

Mrs. Robert Niven, of Frank, was visiting her daughter, Mrs. E. C. MacDonald, this week.

The local lodge of the I.O.O.F. will hold a memorial service on the night of June 17th in the Methodist church.

Jim Haddad has been "making eyes" at a Ford car in Frank for the past week, and we believe a union, not for eternity, will take place.

A memorial service was held in the local Methodist church on Sunday last, in honor of Private Wallace Raynor. Pte. Raynor enlisted from Bellevue two and a half years ago and made the supreme sacrifice some time last month in France. He was well known and a large circle of friends mourn his death.

James Connors, who has been in hospital here for some time, left this week for Rochester, Minn., accompanied by Dr. Mackenzie, where a very critical operation will likely be performed in the hope of saving the man's life. Connors is a member of the I.O.O.F., and the members of Bellevue Lodge are looking after arrangements.

Local and General

"Frankies From Frank" will appear on Monday next.

James Hunter is down from Nanton on a visit to his son.

The Alberta Methodist conference opened in Calgary on Tuesday.

A company is being organized in Alberta for the starting of the pulp industry.

"Little Miss Innocence" was well received at the local opera house last night.

Since April 14 the Italians on the Julian front captured 23,881 Austrian prisoners.

Tornadoes have killed 250 people in seven western States, and wounded over twelve hundred.

The attention of Cattle owners is drawn to a notice appearing elsewhere in this issue.

Dr. and Mrs. O. Lillie left last night for Montreal, and will be absent about five or six weeks.

All Canadian troops in England will celebrate Dominion Day, Monday, July 2, with a complete holiday.

At the opera house one night last week, a lady stood up near Harry Benson—and "viewed the landscape o'er."

Dick Randall will move his tonorial apparatus into his new shop just east of the postoffice corner this week end.

A serious clash was avoided at Hull, Quebec, when armed anti-conscriptismes started to invade the capital.

Mrs. A. E. Stillman, of Calgary, has received word from the University of Alberta of her success in the year's examinations in dentistry.

The tin-can brigade followed a shower party to West Blairmore last night, where the prelude to a happy union commenced. We understand that the knot-expert will perform his functions tonight.

A petition has been forwarded to dept. municipal affairs from the people of Pincher Creek, Cowley, Lundbreck and Pincher Station, desiring that a municipal hospital be located at Pincher Creek.

Now that so many more households have been created by the successful mission of a stock company promoter, refrigerators are being introduced on the local market.

Style—Comfort
Power—Economy

This new Overland Country Club Light Four is a distinctive and smart car in the low priced car class.

The rich gray body, with black fenders and trimmings, is set off to pleasing advantage by red wire wheels that give just the right flash of brilliant color.

The two comfortable front seats move

forward or back, independently, and a spacious side between gives free passage to a roomy seat for two passengers in the rear.

For riding comfort, the Overland Country Club is a revelation.

An unusual demand for this model makes it necessary to place orders at once to secure spring delivery.

Blairmore Hardware Co.
Agents for Crows' Nest Pass

Will take more than a refrigerator to cool some folks off.

Another stock company promoter has managed to wear the optimistic smile of a hundred or more Pass citizens and got away with the precious metal. The Pass has always been noted as the greatest "Bucklerland" in Canada.

to Home Canning

Canning Home Grown Vegetables as Well as Fruit. Should be More General

Just as I was considering how best to put before you the urgent necessity of canning vegetables from your garden started to allow of your putting up your own vegetables for next winter, we received from one of our western neighbors a letter with the following address given by Mrs. McBeath, before the Home Economics Society of the Canadian Agricultural College, with a request that we publish it if possible. We gladly do so, and I may add that directions concerning the various vegetables will be given as the season for them comes.

Probably, said Mrs. McBeath, some of the members of the Horticultural Society have been urging on you the benefits of making a garden, however small, this season, and producing your own fresh vegetables for the cost of your time seems to be going steadily up till we will be largely dependent on our gardens for food.

On the farm we would find it hard to live without a garden, and it is hard to help our families and hired men. Nothing is so nice as good vegetables with meat and potatoes. A small portion of meat goes a long way when served with a good cooked vegetable, and our health and our pockets feel the benefit.

Nearly all gardeners, however, find that they have a surplus of everything, for the seasons are short, and the early vegetables come in such quick succession that it is almost impossible to turn this surplus into a profit in time of a loss, even when they are taking to canning their vegetables, as well as their fruit, and putting them in store for winter use at small cost.

The process is exceedingly simple, and with care in the selection of the material, there is not much chance of failure. Canning in tin is the best method, as canning in jars or bottles, but the increased price of tin, owing to war conditions, will make this method fast now. The ordinary price of tin is about 3 cents, but now they are three times that, so that we will have to depend on bottles or jars.

In this line I would recommend the Economy jar as being the surest to use, and also the most attractive container. Other kinds may be used if care is taken in the selection of the material. Perhaps if I quote you from letters received from some of the canners who cantered in the first time this year, you may be encouraged to try.

One says, "I have put up corn and tomatoes, and I got my cash too for beans and peas. Had says never tasted such delicious corn, and the tomatoes are really far too nice for soap."

Another says, "My beans and peas are fine, also three hundred bottles of other vegetables and fruit, and I tell you I am proud of my own work with the shovels full. Such a help when people come and you have no girl."

Another says, "My peas turned out so good that the neighbors are now what brand of peas I buy. I only use them when visitors come. My husband and I put up a hundred cans of vegetables and wild fruit, and we are just sorry we did not do more, but watch us next year."

There seems little doubt that the canning of vegetables will become as common as the making of preserves, and will indeed be a saving in many families, where vegetables are sadly neglected.

The variety is unlimited; early carrots, peas, beans, corn, tomatoes, cauliflower, spinach, green beans, mixed vegetables for soup. The cost is very small when you put up your own vegetables as only water and a teaspoonful of salt is needed in putting them up. This fall I had quantities of tomatoes, and put up enough to do me all season, at a cost of 5 cents the quart can.

Farm Produce

By Mr. McBeath, Headingley, Manitoba.

Have taken up canning most enthusiastically, and are making great success of it. Put up carefully and with attractive labels they find it difficult in selling to local stores or to neighbors, and thus adding to their income after supplying their own household needs. There seems a good opening here for enterprising girls, who in country districts might be for neighbors on shares.

A young man on a homestead was taking to me of the possibilities in his neighborhood. He had a large home-grown wild strawberries and raspberries are in great abundance, and practically all up to waste as there is nobody to pick them. His idea is to put in an acre of garden stuff, beans, peas, tomatoes, and corn—the fruit as it came in, and when the fruit was over, can the vegetables. The cost of equipment would be very little, and the local country store would take all his output. The idea is a capital one, and there is no reason why the same plan could not be followed out in many other places.

This young man rents his farm, but in carrying out his coming campaign he would be adding considerably to his income besides providing himself with light and congenial work.

To help those who plan to try out canning, I may add that the weekly Canadian Agricultural College is issuing a comprehensive bulletin on dry packing and canning, which, if carefully followed, will ensure success, and I can only say that if you once make a start you will wonder why on earth you did not do it before.

Our readers will be interested in hearing that canning outfits can now be obtained from the Co-operative Stores of the Manitoba Agricultural College, on application to Prof. C. H. Lee.

Few Insect Pests are Known

Worms, Cutworms and Green Bug in Limited Numbers

In the West

Compared with other agricultural regions, Saskatchewan enjoys a virtual immunity from insect pests, there being only a half dozen varieties of insects which are known to do any serious damage to the crops.

The most spectacular, of course, was the onslaught of grasshoppers on the wheat crops of the central and middle of June, 1886, when Saskatchewan, in common with practically the whole western prairie section of the American continent was devastated "to three acres."

Gerald Wolloughby, one of the old time farmers, who has had many experiences with the locusts, says the Saskatchewan Star:

"It was the first year I tried to raise any crop. I had six acres of wheat, and I was anything you ever saw. The locusts, in the flying stage, were like a black cloud, and there wasn't enough of that when it was just in the air, but when it was in your hair, it was a different matter. There were millions in the country then, and less crops. After that, the locusts were gone, and they took to the grass, but they didn't make much impression on the crops. It was a hard year, nevertheless, it was a hard year, and we never see the plague repeated."

Besides the locust, there are wire worms—little animals which attack the wheat in case it is planted the first time, and they break for it. For this reason, it has become customary in most districts to sow flax on new land. There is the wheat, say, the larvae of which get inside wheat, and then work down, weakening the stem so that it breaks and falls over. This is the wire worm, which has never been such a serious pest here as it has in some parts of the United States. During recent years there has been some trouble with the "green bug," a species of plant louse, which has done some damage here as well as in the United States. There are cutworms, also, but these confine their activities mainly to garden plants.

If Germany Should Win

It staggers the imagination to picture the effects upon the world if Germany should win the war.

Germany is based upon sea power. Sea power is based upon ownership of a great fleet, and therefore the biggest navy would disintegrate Canada, Australia, Egypt, India would be detached. And if Germany got the British fleet, what would be left?

Not invasion, for that would not be necessary. We would have to fight for the minor decline with every ounce of our energy and power, and all our resources. We would have to fight to prevent dictation of commercial terms. Even the grandiose German dream of imposing an indemnity upon the United States to pay for the cost of the war, might be faced in terms of actuality.—From World's Work.

Timid Sailor—I suppose when you recall what a handsome man your first husband was you wouldn't consider you a minute?

Pretty Widow—Oh, yes I would, but I wouldn't consider you for a second.

Forest fires to the number of 40,000 are estimated to have occurred in the United States in 1915, destroying the timber covering of about 5,000,000 acres and causing damage estimated at over \$2,000,000.

"Did your master live in a state of perturbation?"

"No, sir. He lived in the suburbs."

Marketing is where the farm woman must start all down. They may raise poultry or make butter, but if they cannot market their produce profitably the most of their work goes for nothing. In a new country like the west, it is long before staple prices and reliable markets get established, meaning selling and buying are rather haphazard, and a real worry to both producer and consumer.

The problem of the woman farmer from town is different from that of the woman who has a small acreage of city markets. The woman in country places has to produce for a market. Now the country store has a problem of its own, as well as the farmer's wife, for they are ever to get at the root of the matter.

How a farmer's wife can get at the root of the matter is a question. How few women really make first-class butter. We know the woman who keeps her butter in a crock, and she is churning, and when it turns out "milk" she is not a farmer's wife, and she will just send it to the store!

"Do you save your money?" I asked a woman who was selling butter. "I have to cheat the grocer and the store!" What can the storekeeper do with it? Life has to be a little harder for the woman who keeps her butter in a crock, and she is churning, and when it turns out "milk" she is not a farmer's wife, and she will just send it to the store!

a price much higher than they could have got for ordinary supplies at home. This was true co-operation.

They may not get together to study the markets and possibilities of your district, and whether butter, cheese, or selling cream, will be most profitable, and all centre their energies on getting a good price. A community organized in this way gets up its name, they tell each other, and so a business gets established.

Were creameries, egg circles, and poultry-dressing stations established generally, there would result a standard market and standard prices in place of the uncertain prices and haphazard selling, which are the discouragement of most country women today.

(To Be Continued.)

Extinction of Grass

Successful Method Used in Manitoba

Experimental Station

When the land for the Experimental Station now located at Morden, Man., was purchased in 1914, it was found to be badly infested with couch grass, a most annoying weed.

In an effort to exterminate this pest, sixty acres of that land the farm which appeared to be the worst infested was treated as follows:

About the first of June, it was ploughed four inches deep and cross-harrowed. The spring tooth cultivator was used in the fall, and the roots well to the top of the ground. Next a chain harrow was employed. This implement brought all the loose grass to the surface and left it in layers only a few inches deep. These rolls were then forked into heaps and were burned about August 1.

Immediately after this the land was again ploughed and again cross-harrowed. This treatment outlined above, and was again ploughed a third time late in the fall.

In the spring of 1916, it was well harrowed then sown and cross-sown with barley at the rate of 1-1/2 bushels per acre. The result was a very good crop of grain and it was almost impossible to find a blade of couch grass in the whole area.—Experimental Farms Note.

Urban Gardening

Regina Recognized as Pioneer in the Vacant Lot Garden Movement

Not only has Regina been a pioneer in the movement for encouraging cultivation of vacant lot gardens, but the movement has made Regina a city where more than in any other city of its size on the continent. The fame of Regina as a garden city has gone far and wide, and frequently requests for information are received from other cities contemplating taking up this movement.

Not only have requests for information come from many points in Canada, both in the west and in the east, but a number of American cities have heard of the movement as conducted in Regina, and only the other day a request was received to the secretary of the vacant lot garden movement from a town in Illinois, for information as to how the scheme was working out there. The gentleman stated that he had heard of the great strides which had been made in the movement here, and wished to get as much information as possible to proceed with the plan in another city.

Wide publicity was given to Regina's movement in the city of Chicago, who is secretary of the dry farming movement, taking prizes at the international exhibition last year, with potatoes grown on vacant lots, and as a result, many enquiries have been received as to gardening conditions in this city generally.—Regin. Leader.

Life Saving Devices

Submarine warfare has resulted in numerous improvements in life preservers and buoys.

The passengers on any ship that sails the Atlantic today are likely to find themselves bobbing about in the icy water with no support but a cork jacket. Some time ago a number of sailors on a torpedoed ship saved their lives at night by signaling to the rescue with little electric flash lamps. This principle has now been incorporated into the latest life buoy by an attachment which carries electric flash lamps as part of its equipment. The lamps burn steadily as soon as the buoy hits the water, and serve to indicate the position of the person asported to any boat that may be nearby for survivors.

The alkali industry in Nebraska is one of the state's. The importance of alkali is a sort of supply. It is estimated that Lake Erie alone will produce 100,000 tons of alkali, worth between \$2,000,000 and \$3,000,000.

Counter Check Books

Of Every Description

and for every line of business. Our books are the Standard of Quality and used from Coast to Coast.

We Specialize on CARBON COATED or BLACK BACK BOOKS, and what we make are the best to be had in Canada.

Duplicate and Triplicate Separate Carbon Leaf Books, in all sizes

Duplicate and Triplicate Carbon Back Books, in all sizes

O. K. Special Triplicate Books, patented

Write us for Samples and Prices before placing your next order, or see our agent, the proprietor of this paper.

Waxed Papers and Sanitary Wrappers

FOR ALL PURPOSES

Waxed Bread and Meat Wrappers, plain and printed. Confectionery Wrappers. Pure Food Waxed Paper Rolls for Home Use. Fruit Wrappers, Etc.

Write for Samples of our G. & B. WAXED PAPERS, used as a meat wrapper. It is both grease and moisture proof and most reasonable in price.

Genuine Vegetable Parchment

FOR BUTTER WRAPPERS

We are large importers of this particular brand of paper. Our prices on 8 x 11 size in 100M quantities and upwards are very low, considering the present high price of this paper. We can supply any quantity printed Choice "Dry" or "Wet" paper. No order too large or too small to be looked after carefully.

Our Machinery and Equipment for Waxing and Printing is the most modern and complete in Canada, and ensures you first-class goods and prompt service.

OF LOCAL AND GENERAL INTEREST

Mike says that it looks like it will soon be so that a girl will have to unlace her shoes when she wants to stretch her knee.

More than 100 Philadelphia women have volunteered as stable inspectors in the campaign under way to exterminate the fly.

Nellie McClung did not speak at the Amalgamated Society of Froth Blowers and Beer Movers' picnic in Elko on Victoria Day.

Declaring that as she had two sons and four brothers in the army, she had nothing further to offer her country except herself, Mrs. Janina Hopkins, of Joplin, Mo., went to Kansas City recently to offer her services as a war nurse.

James R. Hope, until recently proprietor of the Alberta Hotel, Blairmore, has made application for the transfer of the license of the Castlegar hotel at Castlegar, B.C., from W. H. Gage to himself.

Dr. Millburn died at Macleod on Saturday morning, at the age of forty years. He had been a resident of Macleod for upwards of thirteen years, and leaves a widow and two children to mourn his loss.

"Mutt and Jeff's Wedding" is the next offering of the United Producing Co. at the Blairmore opera house on Wednesday night next. It is a hilarious frolic which creates two and a half hours of incessant laughter.

German airplanes raided the English coast on Friday evening last, killing seventy people and wounding over one hundred.

Les Darcy, the Australian heavyweight boxer, and aspirant for the world's championship honors, died of pneumonia in the U.S.A. last Friday. He enlisted about a month previous in the U.S. aviation corps.

Report says that Turkey is being swept with famine and pestilence, and that her army is demoralized. Hundreds are said to be dying of starvation daily, and typhus is sweeping the whole country. German and Austrian troops have been called in to Palestine to attempt bolstering up the Turkish army.

The National Service Commission has reported, after tabulating the returns from the cards, that there are over 300,000 Canadians of military age, of whom but forty per cent are engaged in necessary work. With conscription in force, there should be no difficulty in securing the necessary 100,000 men.

One reason why recruiting has been at a stand still is that the distinction between officers and men is too great when it comes to payment of pensions. Many privates who enlisted from Alberta were racially and intellectually superior to the officers and they should receive the same consideration when their pensions are considered.

Pte. T. Fox, of Hillcrest, has been wounded in action.

A Ford car can do anything. A little dog died on Saturday night, just because of meeting a Ford.

For the fourth time John Kemmis has been nominated by the Conservatives of Pincher Creek constituency.

There is an exhibition in the F. M. Thompson Co.'s window this week, the helmet and kit of a German officer, now the property of Lieut. David Fraser, of Blairmore.

Mr. and Mrs. A. I. Blais, of Frank, desire to express their thanks and appreciation of the many expressions of sympathy shown them in the loss of their eldest son, Ernest, who paid the supreme sacrifice at the front.

The Crows' Nest Pass Coal Co. have purchased a brand new outfit of safety lamps for their mines. The new lamp, which is the invention of Thos. Edison, is the very latest safety device for the mine and is supposed to be absolutely explosion proof. It is an electric light, which is fastened to the cap and charged from small batteries carried on the back. As the initial cause of nearly all explosions is generally attributed to broken safety lamps, the new device should go a long way toward safeguarding the mines and the lives of the miners. The lamp used at the mines here for the past ten or fifteen years is a gasoline fired device.

The federal government will expend \$200,000 in developing the lignite coal fields of Saskatchewan at Estevan.

A sitting of the district court was held at Coleman yesterday, when quite a number of small debt and other civil cases were disposed of.

Since the ex-Czar's wealth has been reduced to only a few millions, he is leaving that an appeal to the charitably disposed Russian people will have to be made.

The weather man succeeded in letting us have four inches of snow on Tuesday.

Miss A. Fulton, trained for Monday morning's funeral from Foremost, where she had been called about two weeks ago owing to the illness of her mother.

All lands in the town of Pincher Creek with tax arrears against them have been confiscated, with exception of lands owned by soldiers and their dependents.

Another semi-occasional issue of the Coleman Bulletin came out on Tuesday of this week. We did not notice whether it is dated 1916, 1917 or 1918, but it is hoped that this is the win-the-war issue.

A pretty young woman tripped up to the counter where a new clerk was assorting music, and, in her sweet tones, asked: "Have you 'Kissed me in the Moonlight'?"

The clerk turned around, looked at her, and answered: "It must have been the man at the other counter. I've only been here a week."

Building permits have been granted to E. Pozzi, to erect a new sign post in front of his lumber yard; to D. May to erect an auto garage on his premises near the corner of State Street and Ninth Avenue; to Alex. Moorey, to erect a dust and water arrester on the south end of his automobile, and to H. Adderley to remove an impediment from the speech of a dreadnought Molaughlan. Business is pickin' up.

"I wish you both joy," said an old minister as he gazed at the beaming faces of the young couple he had just united. "You're getting to the end of all your troubles now," he added encouragingly to the bridegroom. A few months later the old minister met the young man. "You look somewhat miserable, my friend," said he. "Well I might," came the answer. "I thought you told me in the church that I had got to the end of all my troubles." "Ah, so I did," said the minister, "but I did not say which end!"

W. Shaw attended the Alberta Musical Festival at Edmonton last week.

Freddie Welsh has lost the world's lightweight title to Benny Leonard.

Leslie Brown, representing the "Toronto Saturday Night," was in town this week for a few days.

Maudie's casualty list containing the name of T. Cameron, of Hillcrest, reported wounded.

Bert Sinner received word this week of the death of his mother, which occurred in England.

LOST—A dreadnought tire chain for 33x4 tire. Finder will please return to The Star office.

Duncan Macdonald, superintendent of mine rescue stations for the province, was in town this week.
